

Operational Engineering & Deployment

- Infrastructure Migration & Scaling
- Operational Assessments Leading to Actionable Projects
- Resource Optimization & Reorganization
- Process Alignment Around Core Capabilities
- Due Diligence Support for M&A Activities

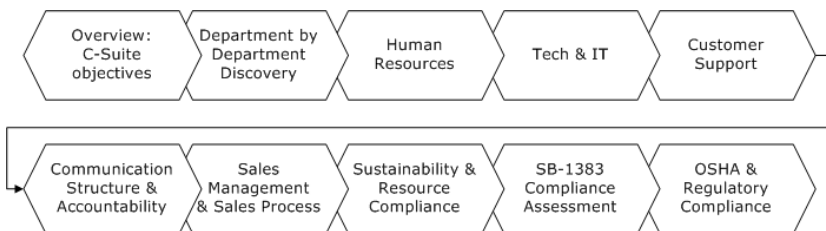

Optimized Effectiveness (E/E Ratio)

Many consultants prioritize *Efficiency* (cutting costs), which often destabilizes a team. We focus on *Effectiveness*; ensuring the right results while preserving product integrity and **Cultural Integrity**. We solve operational problems without alienating the people who run the engine.

“Efficiency without Effectiveness is just a faster way to fail.” ~C.T. Peavey

Operational Diagnostics & Crisis Prevention: (The Jenga Business Checkup)

Most companies don't realize they're in trouble until the damage is done. The Jenga Business Checkup is a structural assessment of your operations, compliance, and sustainability, designed to uncover problems before they become a crisis. We identify hidden faults that standard oversight often overlooks. We're proven in Turnaround situations, but our real value is in keeping you out of Turnaround altogether.

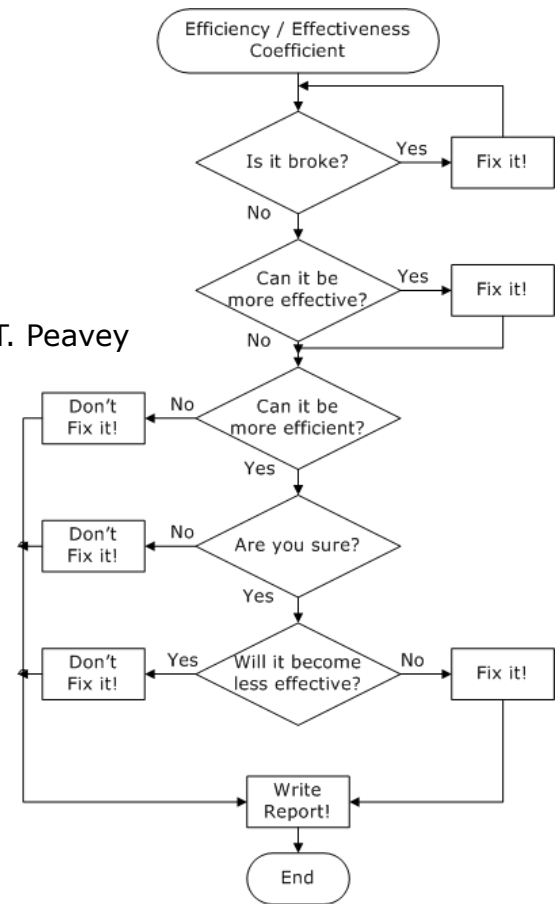

Operational AI Integration:

Properly done, AI acts as an effectiveness multiplier, finally enabling *Centralized Decentralization* as Drucker prescribed for scaling. We structure **digital-first infrastructure** that monitor data flows, trigger unbiased alerts on process or compliance gaps, and uncover root issues fast, bypassing politics, so you maintain true executive oversight as your business grows.

“There is nothing so useless as doing efficiently that which should not be done at all.”

~ Peter F. Drucker

Sustainability & Regulatory Compliance:

We hold **CRRA certification in Sustainable Resource Management**. Unlike consultants driven by activism, we bring engineered sustainability training to navigate **RCRA, OSHA (Cal-OSHA), SB-1383, and SB-350** compliance. We minimize risks and fines while recapturing value from your waste stream.
